**Commissioner of Patents and Trademarks**

The communication in Paper # 21, filed on 8/27/01, is non-responsive to the prior Office action, send on 8/8/01, because of the following reason:

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a) (2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 because the computer readable form of the Sequence Listing is once again defective. See the attached Raw Sequence Listing Error Report for details. Failure to respond to this requirement may result in abandonment of the instant application. It is noted that multiple opportunities were given to applicants to fix the CRF problem. Please contact Mark Spencer for questions on CRF.

Since the period for reply set forth in the prior Office action has expired, this application will become abandoned unless applicant corrects the deficiency and obtains an extension of time under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. In no case may an applicant reply outside the SIX (6) MONTH statutory period or obtain an extension for more than FIVE (5) MONTHS beyond the date for reply set forth in an Office action. A fully responsive reply must be timely filed to avoid abandonment of this application.
